SUMMARY

Versatile self-learner with a keen curiosity and capability in software engineering, software design, software architecture and also machine learning things. I'm an inquisitive person that enjoys learning new things and finding solutions to existing situations and also love to collaborate with different people. I have a positive outlook on life and a solid ability to adapt and build a stable atmosphere. I'm also well proven whenever working under pressure.

EDUCATION

ITENAS University | Information System

During my pursuit of my bachelor's degree in Information Systems, I was also active in several campus activities or department activities such as being a protocol section when there are campus activities and being a mentor for several coding courses. Besides that, during my time at ITENAS I also became a teaching assistant in the data mining course
